# Wheel Alignment

Wheel alignment is a part of standard automobile maintenance that consists of adjusting the angles of wheels. It can help your tires perform properly and help them last longer. It can also improve handling and keep your vehicle from pulling in one direction or vibrating strangely on the road.

It is the way to proper alignment and adjusting the angles of the tires.

## How do I know if I need a tire alignment?

- Vehicle pulling to the left or right
- Uneven tire wear
- Your steering wheel is curved when driving straight
- Steering or wheel vibration
